DALLMEYER'S NEW TELEPHOTO-LENS
THE "ADON"
 (PATENT) Registered

This lens renders Telephotography possible with the smallest and lightest cameras. It is the lightest complete telephoto-lens yet made, weighing only 4 3/4 ounces. It is the only telephoto attachment that can be placed in front of a lens at its infinity focus without disturbing films or plates which are already in position. It will, when used alone, cover any plate from midget to 15x12. It is admirable for artistic portraiture.

Send for illustrated Booklet which gives full details and illustrations showing

size of image with various lenses and camera extensions. Price, including solid leather case and fitting to any lens up to 2 inches diameter, £3 10s. nett.

THE DALLMEYER-BERGHEIM LENS
 is the only photographic instrument which has been designed with the object of recording tone-values, while suppressing unnecessary detail, and this without loss of texture. The lens, although primarily intended for portraiture, is equally useful for landscapes. Particulars and prices free on application to

J. H. DALLMEYER, Ltd., 25 Newman Street, London, W.
